CONFIDENTIAL ASSISTANT
TO THE MAYOR

August 1, 2018

Dear Jones Drive Resident:

I'm writing to provide an update on the infrastructure projects on your street. As you are aware, the underground gas main replacement project through Orange and Rockland has been completed. The Village's drainage project has been completed on your street as well. The addition of the drainage and catch basins will help tremendously in the winter and spring with the thawing of ice and snow.

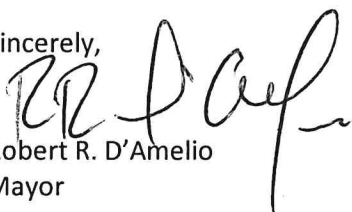

Suez has recently notified the Village of its intentions to replace the water main on Jones Drive. Suez anticipates the start of this project to be in early Spring 2019. Although the timing is not ideal, we are pleased Suez will be upgrading your last remaining underground utility on the street.

Coordinating efforts with our utility companies takes additional time, but the benefit is a complete project from the ground up. Unfortunately, the water main replacement project will setback the timeline for the milling and paving of your street. The Village Board and I believe holding off just a little longer will allow for a much more comprehensive completed project.

I'd like to personally thank you for your patience and understanding with all the construction that took place this year. We understand the inconvenience some of the upgrades may have caused; however your underground infrastructure will be sound for many years to come. Please continue to have patience as we get through the last phase of this project next year and finally mill and pave your street.

Future updates will be posted on the Village website. If you have any questions or concerns, do not hesitate to contact me.

Sincerely,

Robert R. D'Amelio
Mayor
